Christian Riffel was born in 1982 in Argentina and lives in Buenos Aires. At the end of 1998 he begins his artistic career giving himself place in the urban space, being the second generation of urban artists in northern Buenos Aires.

He studied Graphic Design at the FADU UBA (Architecture, Design and Urbanism of the Buenos Aires University). He worked several years as graphic designer for many companies.

In 2007 performed workshops and seminars in art colleges and universities, with the purpose of strengthening his vision and his sensitivity as an artist.

Since 2008 he paints murals and exhibits his artwork earning international recognition in various festivals and exhibitions in America and Europe.

His artwork is based on a return to consciousness and reflection of human existence and his altered interpretations of the excesses of today.

He idealizes this distortion through unique geometric compositions, based on a color and space search. The aim of his paintings is to express the various stages through space, generating a strong objectification in his compositions. He is currently working on his first sculptures and installations.
